

1. Climate change: [The Green Party has the only plan](#) to keep Canada's commitment of 1.5C above 2005 average temperatures. It is a large task, but we have everything we need to achieve it. We need to stop burning things to get around. We need to stop burning things to make electricity. After that, everything else is easy. And yes, I'm in support of public climate science

2. Tax fairness: We will [close the loopholes](#) enjoyed by the richest companies in the world - mostly big tech, big oil and big banks.

3. Outsourcing: As your MP I will commit to keeping our public service with the capacity of operating itself. Outsourcing can be very beneficial, but the tipping point was crossed where our public service has become dependant on those not employed by our nation's government. We must correct things so contractors are used to enhance service, not deliver core mandate.
